

Recent News - Organic Ensembles and Reflections on Principles:
By Shomit Sirohi

Introduction

With simple measures for the poorest – to re-structuring capitalism to include state developments and public borrowing for public spending – to in fact state led development for the people – the new economic conjuncture with the mass protest is in fact an EU management of state economics which mystifies the left in Europe to the clear victory of Third World Communist countries with a mediating role played by New lefts in Latin America – let us say First to Communism, second to Latin Americans and then third to metropolitan European capitalism.

I. The Development of Neo-liberalism and Recent Changes towards People's Rights –

In fact the post-Fordist agenda of capitalism and neoliberal mass medias and even governments which cannot manage the crisis had led to right wing politics getting mainstreamed across the world which then is finally defeated by the mass resistances of the poorest in India, and working class unionism which then in the world reflects the same story which is of peasant resistance and working class revolt producing the new syntax of high capitalist financialisation being attacked by the people in terms of even Europe's Communist parties returning to the mainstream after its periodization by 2008 with the failure and neoliberal attack on Indian Communism, which was left with just one state and minimal national relevance in that since.

Recently the mass protests and working class protests, which are an arc in the Sirohian sense of producing also a inter-tanglement of mass protests in Cuba, Algeria and China and Europe, even Latin American protests recently in Ecuador and Bolivia, and Venezuela which becomes therefore a period of cycles of social movements which are winning in the Leftist government the people's economics as – state led in Latin America and Cuba, with capitalist Renaultism in the European and Indian contexts.

II. Reflections on Arcs and Sub-arcs in History and Making a Connection – people's protests and the Left as Leading principle

In fact there have been arcs of Soviet revolution followed by arcs after arcs of Cuban revolution, Algerian independence, even Black power in America and Communist parties with the CPSU and all of this was 1950 – 1980 which then became mass new protests and new lefts in Latin America from the 1990s onwards, which failed into crisis and far right agendas in the recent post-Fordist petit-lumpen developments across the world from Mexico to even Brazil and finally all over Europe and in India and perhaps Chinese market socialism.

The recent arc in the 2019 – 24 period puts history back in the agenda which means that the mass protest model from India and in the world – harkens back to the reflections of Fidel in the 1960s – that in fact revolution is ongoing and permanent revolution.

III. Mass Media Today therefore – and Capitalism Today

In fact the mass media is a bourgeois propaganda machine and for the first time again since the Soviet years, there is dependable media in the sense of a leftist media which then is the new element in capitalism today - Deterior company or capital which is a leftist model of private television and socialization which also has free software embedded in it - of course the revolutionaries would access this website and capitalism and all its inventions to aid the world's left with a new media and journalism format.

IV. Re-arguing for Healthcare - is Sirohi a Leader and is he a Prophet as well?

In fact healthcare is also resolved in the same movement as revolution - that Sirohi is a psychoanalyst and doctor who is aware of medicine and all its science and is in fact a scientist which is his integrated approach in philosophy which makes him a scientific materialist and philosopher, and politician - this then is the judgement of Marxism and Leninism - that in fact French philosophers as well accept him as a mathematical dialectician - because of course he is a teacher of principles - like the shift from neo-liberalism to mass protest. Which then means leftist governments, errors in Europe, but management of Communism for the revolutionaries at the heights of even news and letters in his p2p modelled Deterior website, on news and journalism and books and research.

So of course when science joins the revolution - Fidel is reborn with Che in the sense of diagnosed in scientific healthcare along with Mao Zedong and Trotsky and even Lenin, Mazumdar and Sanyal. Along with their recovery comes a science of eternal healthcare.

V. Class Action, Mass Protest, And Healthcare - now of course new Economic Principles - Judging in Revolutionary Syntax the New Economic World Bank, IMF and EU policies

So in fact with the poorest participating in mass protest - the new model is simple - just the financial high transactions but also protest for wage bargaining culture which then is successful only in Communist India and Communist parts of the world perhaps in Ecuador and Bolivia and Venezuela - the model simply makes the state give to the people a minimal wage - which then is 1 lakh people with 1 lakh rupees - a simple petit gesture which frees all the people - Sirohi would remark.
